Zabbix Acceptance

1. New type of preprocessing "Convert to UTF8" must be supported and available for items, item prototypes and LLD rules:
    a. Convert non-UTF8 input to UTF8, same way as it works currently for log monitoring
    b. It must accept parameter to specify encoding, all encodings supported by libiconv must be allowed,
       see https://www.zabbix.com/documentation/4.0/manual/config/items/itemtypes/zabbix_agent#available_encodings

Use cases

1. Conversion of non UTF8 incoming values into UTF8 representation
